

Welcome to AGIS Industrial Services

As an experienced assembly firm in mining and forestry industries and a part of the Cemtec Group, we offer numerous advantages to our clients.

We seamlessly integrate planning, manufacturing, supervision, and assembly, resulting in satisfied customers over many years.

Cemtec's extensive expertise in plant design for raw material processing, coupled with our proficiency in assembly, creates a significant competitive edge for our clients.

The synergy of theory, practice, and experience adds genuine value, distinguishing us uniquely as an assembly firm.

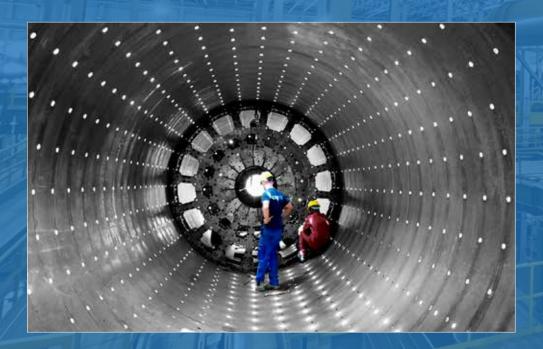

In addition to delivering outstanding performance, safety is paramount to us.

As a globally operating company, we adhere to international safety standards and understand their effective implementation worldwide.

Ultimately, it is our commitment to quality that defines us as an assembly firm.

We are here to support you and ensure the successful realization of your assembly project.

We look forward to hearing from you!

Services

- · Project-management & Supervision
- Mechanical installation of industrial plants
- Relocation of industrial plants + Maintenance of industrial plants
- · Industrial services in cooperation with CEMTEC

Industries:

- · Stone-, earth- and cement-industry (CEMTEC area)
- Wood-industry like sawmill and wood-based panel industry like PB-, MDF- and OSB boards

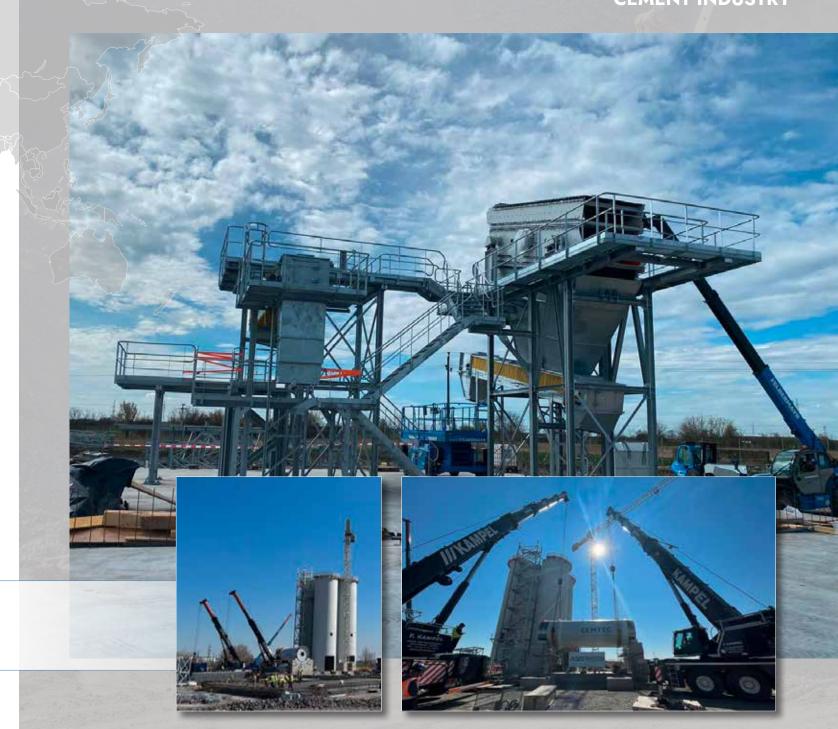

Reasons for choosing AGIS/CEMTEC:

- · High safety standards with external safety representatives
- direct communication within the CEMTEC-Group independent of client and contractor relationships
- · well-trained manpower and several years of experience — for equipment supplied by CEMTEC-Group
- One-contact person for equipment and mechanical erection part

- Installation of CEMTEC equipment as well as equipment supplied by end client
- Mechanical installation of a preparation plant consisting of:
- Pre-treatment incl. crushing plant, drying plant & transport & dedusting equipment
- Grinding circuit with ball mill / DMGH2 drive + high efficiency air classifier
- Truck loading incl. truck scales

Location: Hungary

Location: Italy

ACTIVITIES

Installation of a Cement mill ø 2,4 x 7m supplied by CEMTEC

CEMENT INDUSTRY

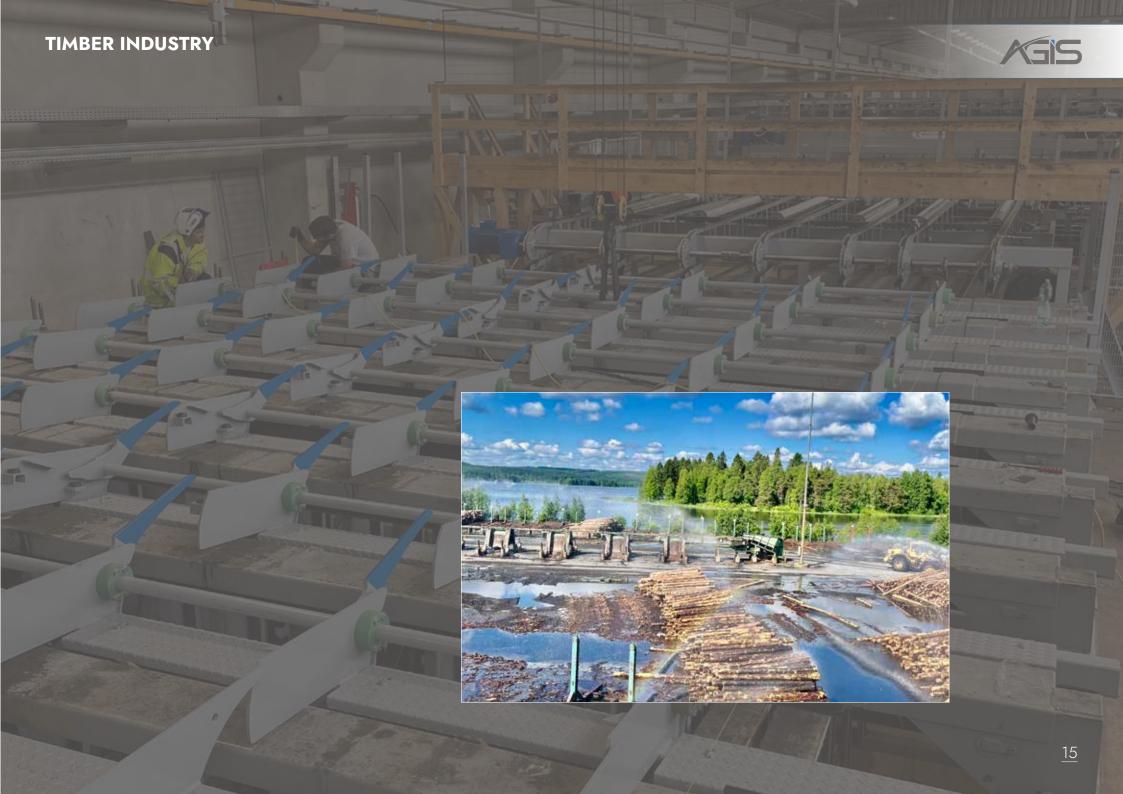

ACTIVITIES

- Dismantling of old journal bearings of cement mill ø 3.0 x 11 m and lubrication unit
- Installation of new fixed and floating trunnion bearings and lubrication units incl. piping
- machining of trunnion surface on site

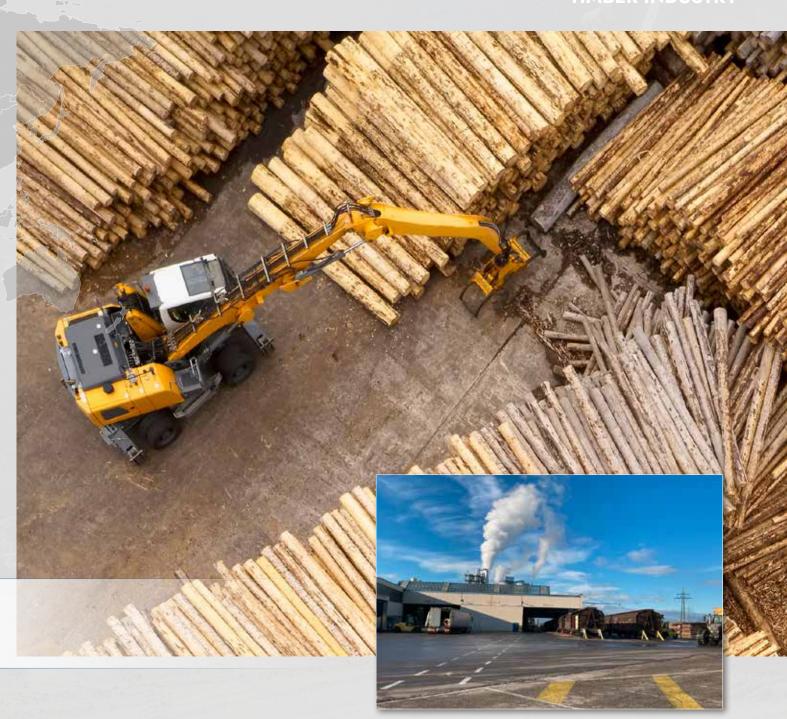

Installation of a new log line

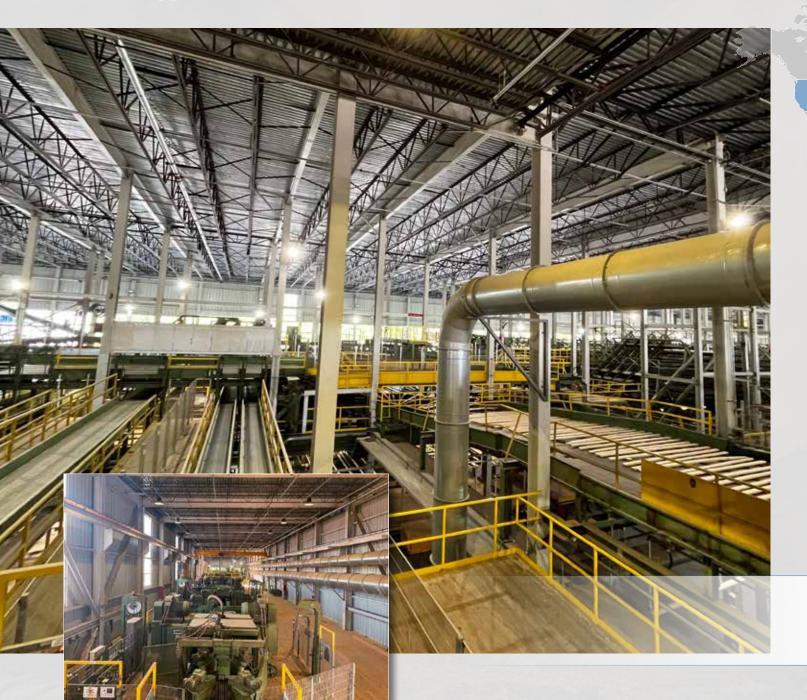

- Installation of 3 lumber sorting lines
- Installation of the package manipulation line

- Mechanical installation of the recycling plant
- Integration into existing plant
- Installation of a briquetting plant
- Ongoing revision and maintenance jobs

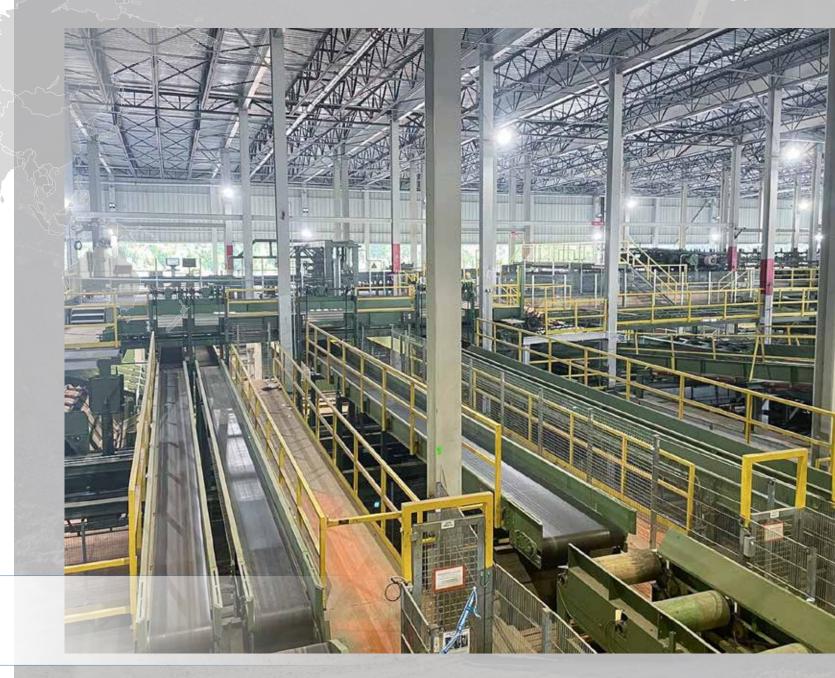

- Start-up support
- · Modification works

Location: USA

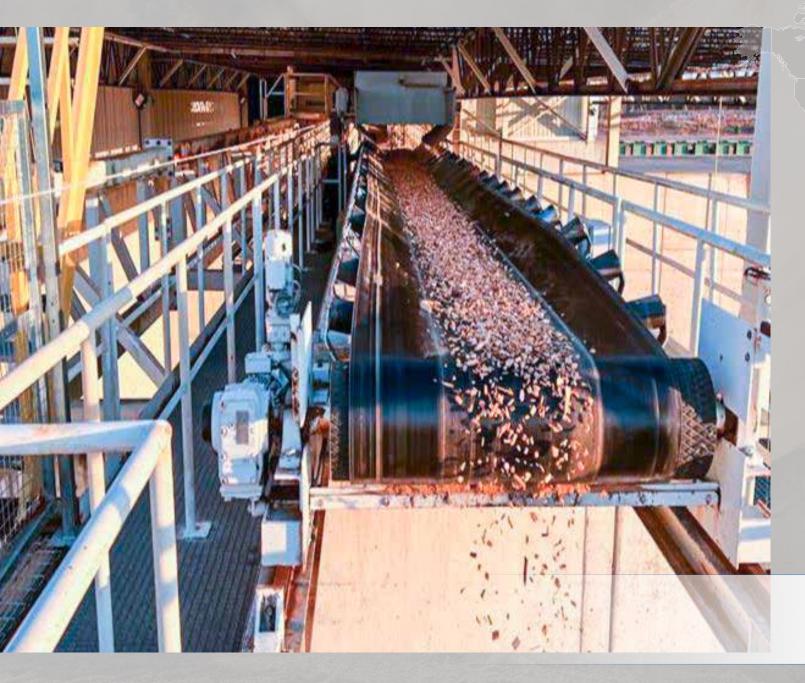

TIMBER INDUSTRY

ACTIVITIES

- Maintenance management
- · Ongoing maintenance and modification works

Location: Finnland

Ongoing maintenance and modification works

Location: Germany

- Recycling plant für metal oxide supplied by a member of CEMTEC Group
- · 1 Pelletizing Disc ø 4,5 m
- Mixer and drum dryer ø 2,5 x 4,5m
- · 18 to/h
- · incl. finish product handling (big packing)

Location: France
